MAX DECALS

Max 4820
Irish Air Corps
Selection 1990-2010

1/48 scale Decals for:

SA 365Fi Dauphin. Use the Trumpeter kit with Fireball Modelworks FMR-003 nose and tail conversion.

SA316B Alouette III. Use the Fujimi kit which is 1/50 scale.

Sa342 Gazelle. Use the 1/48 Fujimi kit. Note tail fin is slightly underscale.

Reims Cessna FR-172H. Use the Minicraft kit or the older Esci and Modelcraft kits.

SIAI Marchetti SF-260W Warrior Use the Planet Models resin kit.

Pilatus PC-9. Use the forthcoming AZ Models kit.

Some model paint info:
Forest Green
FS14079=Xtracrylix Xa1110
RAL 7035= Revell Aquacolor 36371
Humbrol Hu196 or Xtracolor X260 are also listed as matches to RAL 7035.

How to use the decals.
Cut around each item and dip in tepid water for a few seconds until the decal will slide off the the backing paper.
Place on model and press down with a damp tissue. Microsol and Microset decal softening solutions may be used but are not usually necessary.
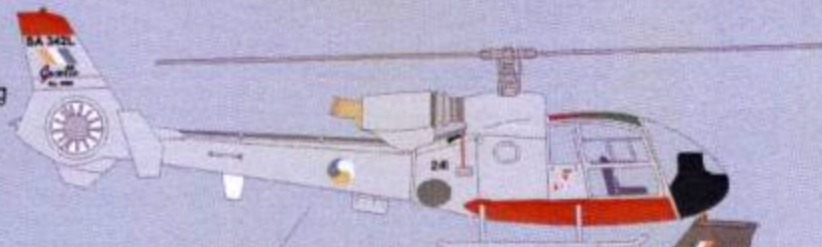

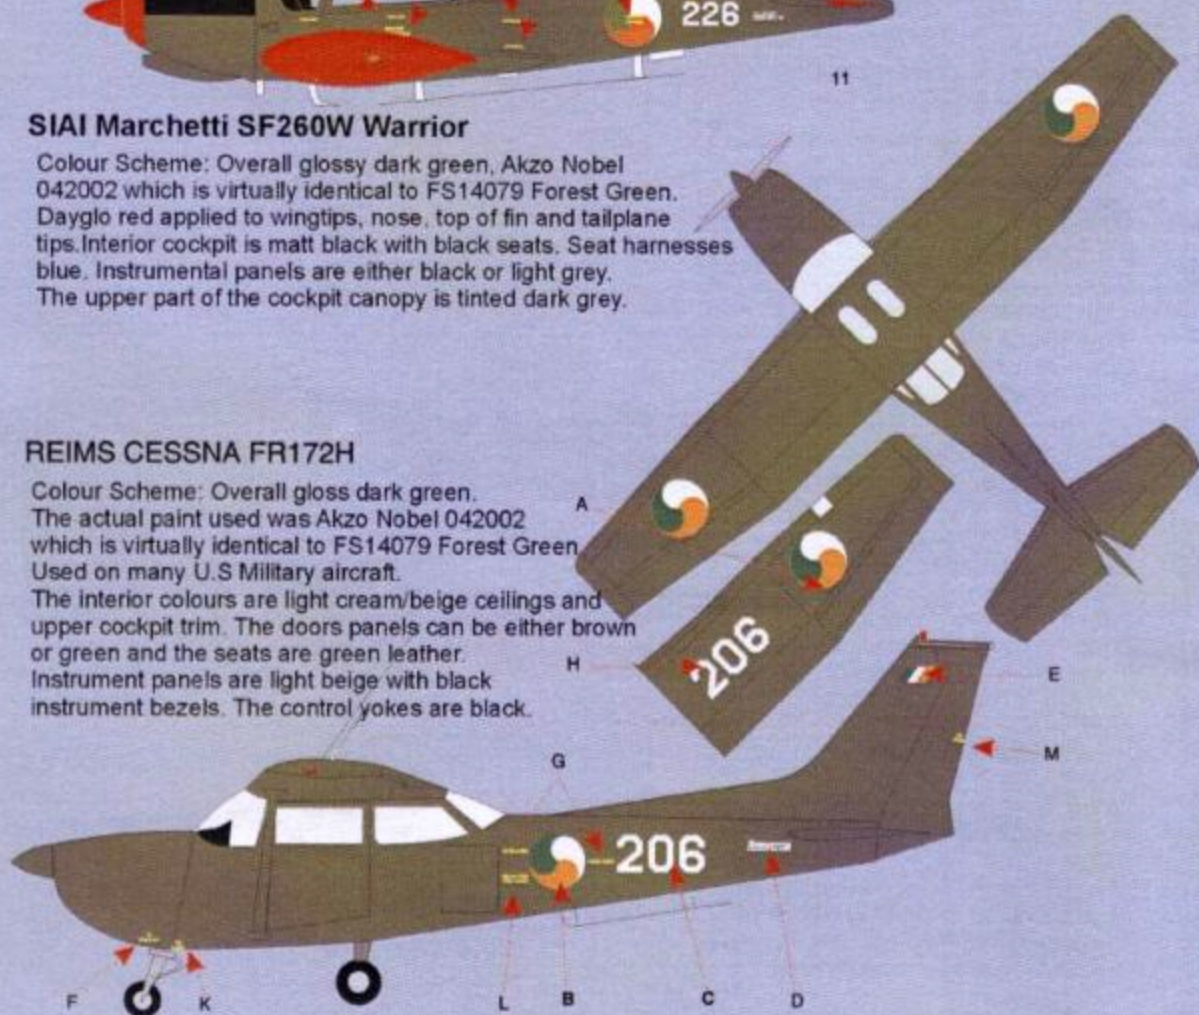

SIAI Marchetti SF260W Warrior

Colour Scheme: Overall glossy dark green, Akzo Nobel 042002 which is virtually identical to FS14079 Forest Green. Dayglo red applied to wingtips, nose, top of fin and tailplane tips. Interior cockpit is matt black with black seats. Seat harnesses blue. Instrumental panels are either black or light grey. The upper part of the cockpit canopy is tinted dark grey.

REIMS CESSNA FR172H

Colour Scheme: Overall gloss dark green. The actual paint used was Akzo Nobel 042002 which is virtually identical to FS14079 Forest Green. Used on many U.S Military aircraft. The interior colours are light cream/beige ceilings and upper cockpit trim. The doors panels can be either brown or green and the seats are green leather. Instrument panels are light beige with black instrument bezels. The control yokes are black.
